

Did You Know...

Amelia Island Plantation operates a Green Depot as a recycling center outside Marché Burette. It is a hut containing plastic, metal, glass, and newspaper recycling receptacles and provides guests the opportunity to participate in Amelia Island Plantation's Green Program.

How do I use the Green Depot?

To deposit your recyclables, first separate them by type (paper, plastic, metal, etc.). Remove recyclables from bags and place them in the appropriate bin

Here are some things to keep in mind when recycling at Amelia Island Plantation:

- Plastic must be number 1 or 2
- Plastic screw caps may remain on bottles or be placed in the container designated for plastic
- Glass items may be mixed regardless of type or color
- Aluminum lids go in the container designated for metal
- The container designated for newspaper is for newspapers only

Why recycle at the Green Depot? Recycling is part of Amelia Island Plantation's commitment to staying "In Harmony with Nature" and is an important component of our Green Program.
